

## Academic License Program: Shaping the Future of Mining Engineering

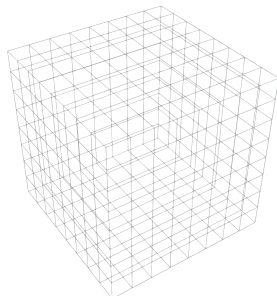

Promine is an active proponent of education in mining and geology. The Promine Academic Program grants universities around the world and their students free access to Promine software to assist in academic development and career readiness.

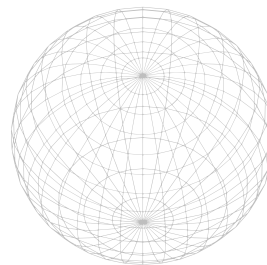

Promine's Academic Licensing program gives students access to the entire Promine suite:

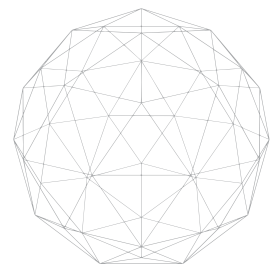

Essentials

Modeling

Geology

Engineering

*The Most Flexible, Affordable and Easy to Use AutoCAD Mining Software.*

By enlisting in Promine's Academic Program, your students will have the benefit of learning advanced AutoCAD integrated time saving tools to assist in geology and mine planning processes.

## Benefits

- Incorporate industry-standard AutoCAD mining and geology software into your academic programs.
- Have accessibility to cutting edge mine planning software.
- Receive the appropriate training and support at your institution from Promine experts.
- Give students an advantage in technical knowledge and experience in preparation for the workforce.
- Enable students to work faster and mine smarter.

## Promine Offers

- Full suite version installed on the mining engineering software lab and the instructor PC.
- Promine training material.
- Software updates.
- Technical support.
- Training certificate.
- Yearly renewals.

## The School Commits To

- Pay training and travel expenses for one specialist at your institution.
- At least 2 professors or faculty members to attend the training.
- Permission to use name and/or logo on our website.
- Try to integrate Promine in the university curriculum.

## What's The Next Step?

Have your professor contact us at [info@promine.com](mailto:info@promine.com) to begin the formal application process.

### *Please Note:*

- Promine will only be installed on legitimate AutoCAD licenses.
- Promine Inc. Reserves the right to cancel the service at any time.
